

Information security policy

Policy – Effective: February 2023

Last update: December 2024

QUADPACK aims to offer cosmetic packaging solutions for beauty brands, seeking to anticipate the needs of the market, as well as offering the best packaging design and technology.

This objective requires periodically assessing the company's risks to ensure the continuity of QUADPACK's business. Furthermore, based on the risk analysis conducted by the company, measures are taken to identify and select applicable controls and implement the necessary information security measures to guarantee the confidentiality, integrity, and availability of the information.

QUADPACK, through its information security management system, establishes its security objectives and provides the necessary resources to implement actions to ensure continuity of service for all its stakeholders in a safe and efficient manner, complying with current legislation and with the voluntary commitments entered with third parties, especially regarding compliance with regulations on personal data protection.

Raising awareness and training our collaborators, improving the performance of our processes through optimal design and operational planning, maintaining our systems, providing them with the corresponding security measures, as well as controlling and measuring the results achieved, are the basis for achieving our goals and objectives through continuous improvement.

The functions of the roles and responsibilities that form part of the information security management system are set out in the company policies.

QUADPACK Management undertakes to review this policy periodically, adapting it to any new requirements that may arise, and making it available to all interested parties who may require it.
